

Quality, Safety and environment

The integrated certification in Quality, Safety and Environment plays a key role in Pinto & Bentes global business politics. The integrated management system for Quality, safety and environment is now totally certified making this an important objective achievement, allowing Pinto & Bentes to be one of the few companies certified by NP EN ISO 9001:2000, OHSAS 18001 (Safety) and ISO 14001 (Environment) standards.

Pinto & Bentes has implemented the quality business system in project, construction and maintenance of electricity lines both overhead and underground, in low, medium, high and very high tension, transformation points, substations, public lighting, live tension work in low medium and high tension, metallic structure fabrication for telecommunication, transportation and distribution of electricity, construction of gas network and telecommunications.
